

Akatab - Documentation

Thank you for your interest in the Akatab fonts. This project is intended to provide a free and open font family for current languages and writing systems that use the Tifinagh script. It supports many of the Unicode characters for this script. It also includes a large set of ligatures useful for linguistics and literacy work. Smart font routines automatically produce these ligatures. In addition, user-selectable features are included to choose variant characters or ligatures.

This documentation is a set of HTML pages that can be viewed in any modern web browser. PDF versions of these pages are also provided. This content, plus download links and a contact form, is available from the [Akatab web page](#).

- [About](#) — Information about this project and SIL International
- [Resources](#) — Help with installation and use
- [FAQ](#) — Common questions and answers
- [Design](#) — History and background of the design
- [Character set support](#) — Details of Unicode characters that are supported
- [Font features](#) — Using smart font features
- [Support](#) — How to get additional support
- [Developer information](#) — How to modify and build the fonts
- [Versions](#) - Sources for alternate versions
- [Version history](#) - Complete version history

Additional information is also provided in other project files: [README.txt](#), [OFL.txt](#), [OFL-FAQ.txt](#), and [FONTLOG.txt](#).
