Akatab - Documentation

Thank you for your interest in the Akatab fonts. This project is intended to provide a free and open font family for current languages and writing systems that use the Tifinagh script. It supports many of the Unicode characters for this script. It also includes a large set of ligatures useful for linguistics and literacy work. Smart font routines automatically produce these ligatures. In addition, user-selectable features are included to choose variant characters or ligatures.

This documentation is a set of HTML pages that can be viewed in any modern web browser. PDF versions of these pages are also provided. This content, plus download links and a contact form, is available from the Akatab web page.

- About Information about this project and SIL International
- Resources Help with installation and use
- FAQ Common questions and answers
- Design History and background of the design
- Character set support Details of Unicode characters that are supported
- Font features Using smart font features
- Support How to get additional support
- Developer information How to modify and build the fonts
- Versions Sources for alternate versions
- Version history Complete version history

Additional information is also provided in other project files: README.txt, OFL.txt, OFL-FAQ.txt, and FONTLOG.txt.
